### **Certificate of Participation at Marine Biodiversity Citizen Science Summer School as Educator**

iSea is a Not-for-profit non-governmental organization, founded in 2016 in line with the Articles 741 et seq. of the Civil Code and the applicable company law legislation of the Greek State. The overall aim of iSea is to preserve and restore the precious and unique heritage of the natural aquatic environment; its main pillars focus on the following four topics: aquatic litter, the relation of humans with aquatic ecosystems, alien/invasive species, and fisheries.

In the context of iSea's projects aiming to foster scientific knowledge and education through citizen science tools, a Marine Biodiversity Citizen Science Summer School was conducted in Chalkidiki Peninsula, between 30/4 and 4/5 2019. This letter confirms that Chris Taklis participated as an educator in Marine Biodiversity Citizen Science Summer School, educating participants in the use of different citizen science platforms like iNaturalist and the identification of marine organisms.

We will be at your disposal for any further information.

On the behalf of iSea,

The Project Manager,

Ioannis Givos

Marine Biodiversity Citizen Science Summer School is organized within MIO-ECSDE's 'Mediterranean Action Day 2019: Promoting Participatory Science in the Mediterranean' supported by the LIFE+ Operating Grant for NGOs.
